

Likith Naidu Anumakonda

B.Tech CSE (Artificial Intelligence) Student

likith.naidu@icloud.com — Portfolio — GitHub — LinkedIn

Education

B.Tech in Computer Science & Engineering (Artificial Intelligence)

PBR VITS, Kavali, India

2024 – 2028

Relevant Coursework: Data Structures, Object-Oriented Programming, Machine Learning, Databases, Cloud Fundamentals

Technical Skills

Languages: Python, Java

Machine Learning / AI: LLaMA, Retrieval-Augmented Generation (RAG), Scikit-learn, Pandas, Feature Engineering, Model Evaluation

Web Technologies: React, Next.js

Databases: SQL, MongoDB

Tools & Platforms: Git, Linux, Firebase, REST APIs

Experience

Machine Learning Intern (Independent Project)

2025 – Present

Prometheus AI Platform

Remote

- Built and deployed an LLM-powered AI assistant using LLaMA models integrated with Retrieval-Augmented Generation (RAG).
- Designed backend APIs in Next.js to manage prompt orchestration, context retrieval, and response streaming.
- Implemented vector-based document retrieval to improve factual accuracy and reduce model hallucinations.
- Deployed a public-facing web application with real-time chat, text-to-speech support, and session management.

Projects

Prometheus Data Automation Engine

Python, Pandas, Scikit-learn

Live Demo — GitHub

- Designed a modular automation engine for large-scale data processing and predictive analytics.
- Reduced ETL pipeline runtime by 95% through optimized data workflows.
- Achieved 88.5% validated prediction accuracy via feature optimization.

AI Path Generator – SIH Hackathon 2025

React, Next.js, Firebase

- Led a 5-member team to develop an AI-driven web application for dynamic path generation.
- Implemented real-time data processing and delivered an award-winning user interface.

Desktop Utility Application

Python, Tkinter

- Built an asynchronous desktop application using multithreading for system-level operations.
- Improved execution performance by 12% using non-blocking I/O architecture.

Review Engine

Java, Swing, SQL

- Developed a scalable desktop application following SOLID design principles.
- Implemented secure SQL transactions and modular architecture.

Certifications & Awards

- MongoDB Certified Developer
- Advanced AI/ML Specialization – IIT Patna (I-Hub Vishleshan)
- 1st Prize – CodeClash 2025
- Best Concept Award – Technova2K25
